SUMMARY

Product Designer and AI-assisted product builder with an engineering background and hands-on experience launching a real iOS product from concept to App Store release. I combine UX research, analytical thinking, product strategy, and AI-assisted development workflows to define problems, design user-centered solutions, coordinate technical implementation, and improve products through testing and iteration.

My recent work includes pawtrck, a dog care tracking app covering health records, diet, exercise, medication reminders, subscriptions, and App Store launch readiness.

FEATURED PRODUCT EXPERIENCE

pawtrck - iOS Dog Care Tracking App

Independent Product Designer & AI-Assisted Product Builder | 2026 - Present

- Independently led the product from concept to App Store launch, owning product strategy, UX/UI design, AI-assisted development workflow, testing, subscription setup, and release preparation.
- Designed a mobile experience that helps dog owners track diet, exercise, health records, medication reminders, vet visits, and long-term care history in one place.
- Used structured research, analytical thinking, and AI tools to understand technical requirements, make product decisions, and turn product ideas into working app features.
- Managed App Store launch readiness, including subscription compliance, privacy and terms requirements, paywall updates, and reviewer-facing notes.
- Planned monetization and growth workflows through pawtrck Plus, subscription access management, free trial logic, and influencer promotional access.

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer

Elite Gaz | Jul 2024 - Mar 2026

- Conducted gas analysis and quality assurance processes in a TURKAK-accredited environment.
- Worked with FTIR, Multiexact, and Ultramat devices to support accurate measurement, compliance, and reporting.
- Developed dedicated FTIR methods for different gas groups and improved measurement reliability through root cause analysis.
- Collaborated with R&D and quality teams on process improvement, documentation, and technical problem solving.

R&D Engineering Intern

MEGE Teknik | Nov 2022 - Dec 2022

- Designed and analyzed aircraft and helicopter-related components using SolidWorks, Ansys, Abaqus, and CATIA.
- Supported modal and thermal analysis tasks for aerospace-related parts.
- Researched material properties and contributed to early-stage R&D evaluation processes.

EDUCATION

University of Turkish Aeronautical Association (Türk Hava Kurumu Üniversitesi) | 2017-2022

Bachelor of Engineering in Astronautical Engineering

- Language of instruction: English
- Built a strong foundation in analytical thinking, systems engineering, technical problem solving, and engineering design.

Google UX Design Professional Certificate | January 2023 - September 2023

Professional UI/UX Course

- Gained expertise in UX research, inclusive design, user centered design, creating personas, wireframing, and high-fidelity prototyping.
- Developed a portfolio showcasing two UX design projects.

SKILLS

- **Product & UX:** Product Thinking, UX Research, User Flows, Wireframing, Prototyping, Usability Testing, Information Architecture, App Store Launch Preparation
- **AI-Assisted Workflow:** AI Tooling, Prompting, Technical Research, Product Documentation, QA Testing, Iterative Problem Solving
- **Design Tools:** Figma, Adobe XD, Adobe Illustrator, Adobe Photoshop, Canva
- **Technical Understanding:** Mobile App Architecture, React Native / Expo Collaboration, Backend Concepts, RevenueCat, App Store Connect, Supabase, GitHub Workflow
- **Engineering & Analysis:** Root Cause Analysis, Quality Assurance, R&D Documentation, Analytical Problem Solving

PRODUCT FOCUS

Interested in product roles where I can combine UX research, analytical thinking, AI-assisted workflows, and end-to-end product ownership to design, test, launch, and improve user-centered digital products.
